

KANAD KAPIL

Dhaka, Bangladesh | +880 1869 7420 69 | kanad.kapil@gmail.com
[linkedin.com/in/kanadkapil](https://www.linkedin.com/in/kanadkapil) | github.com/kanadkapil | Portfolio: kanadkapil-portfolio.vercel.app

Professional Summary

B.Tech Computer Science graduate specialising in Full-Stack Development. Experienced in building scalable web applications, interactive educational platforms, data analysis and visualization. Developed a BiLSTM-based protein sequence analysis framework achieving 81.53% Q3 accuracy across 95,000+ protein sequences and contributed to COPD deep learning research focused on diagnosis and progression tracking. Passionate about AI-powered systems, modern web technologies, and user-centric product development.

Skills

Programming Languages: Python, JavaScript, C++, HTML5, PHP, SQL, LaTeX, Markdown, TypeScript

Front-End & Web Frameworks: React.js, Tailwind CSS, DaisyUI, Chart.js, Express.js, Streamlit, Pug, MathJAX, Laravel, MERN Stack

AI / ML & Data Science: Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn, Power BI

Databases & Cloud: MySQL, MongoDB, NoSQL, Google Colab, Vercel, GitHub

Tools & AI Platforms: VS Code, Google AI Studio, Prompt Engineering, Mermaid, Scrapy, Canva, Google Stitch, Google Workspace, Google AI Studio, AntigravityCLI

Languages: English, Bengali, Hindi

Soft Skills: Communication, Leadership, Teamwork, Project Management, Presentation

Education

Lovely Professional University, Punjab, India Aug 2022 – June 2026
B.Tech in Computer Science & Engineering CGPA: 7 / 10

Mohammadpur Preparatory School and College, Dhaka, Bangladesh 2018 – 2020
Higher Secondary Certificate (12th) GPA: 4.75 / 5

Willes Little Flower School and College, Dhaka, Bangladesh 2016 – 2018
Secondary School Certificate (10th) GPA: 4.78 / 5

Experience

Web & Data Analyst | [Manohari.Shop](#), Bangladesh Jun 2023 – Present

- Architected a Streamlit and Python-based business intelligence KPI dashboard, visualizing 5+ real-time e-commerce metrics including revenue, sell-through rate, and inventory turnover.
- Reduced leadership reporting cycles by approximately 40% through automated analytics and visual reporting pipelines.
- Administered web infrastructure, optimized analytics workflows, and implemented data-driven decision support systems to guide marketing and inventory strategies.

Projects

Protein Sequence Deep Learning Framework Oct 2025 – Apr 2026
Python | TensorFlow | Keras | BiLSTM | Scikit-Learn

- Engineered a BiLSTM-based deep learning architecture using TensorFlow and Keras for protein secondary structure prediction and family classification across 95,000+ sequences.
- Achieved 81.53% Q3 accuracy for secondary structure prediction and 77% accuracy for protein family classification through hyperparameter tuning and model optimization.
- Developed an interactive exploratory data analysis (EDA) visualization dashboard using Streamlit to display sequence analytics and model predictions.

COPD Deep Learning Research Review Jan 2026 – May 2026
Deep Learning | CNN | BiLSTM | Healthcare AI | Research

- Researched and co-authored a comprehensive, IEEE-style review paper analyzing AI-driven Chronic Obstructive Pulmonary Disease (COPD) diagnosis and progression tracking systems.
- Evaluated deep learning architectures, including CNNs, LSTMs, BiLSTMs, multimodal fusion systems, and Electronic Health Record (EHR) predictive analytics.
- Synthesized clinical insights from prominent datasets, including COPDGene, MIMIC-III, and the ICBHI Respiratory Sound Database.

AlgoViz — Interactive Learning Platform

React.js / Tailwind CSS / DaisyUI / Chart.js / MathJAX

- Developed an interactive visual learning platform utilizing React.js and Tailwind CSS to teach Data Structures, Algorithms, DBMS, and Operating System fundamentals.
- Designed and built 20+ interactive modules visualizing sorting algorithms, trees, graphs, recursion, and dynamic programming.
- Enhanced conceptual understanding for 100+ Computer Science students, increasing engagement and learning efficiency.

JavaScript Mini-App Collection (30+ Apps)

HTML / CSS / JavaScript / Tailwind CSS

- Created 30+ production-ready mini web applications, integrating REST APIs, utility tools, games, and responsive user interfaces.
- Optimized DOM manipulation and state management in front-end development using HTML5, CSS3, and modern JavaScript (ES6+).

Certifications & Achievements

• Data Structures & Algorithms — GeeksforGeeks (C++, Python)	2024
• Cloud Computing — IIT Kharagpur / NPTEL	2025
• Generative AI (Multiple Courses) — Coursera	2024
• Project Management — Coursera	2026
• Web Development Bootcamp (66 Hours) — Udemy	2023
